

THE COMPLETE BATTERY SOLUTION

MOBILITY PROGRAM

YOUR TOTAL BATTERY SOLUTION

Our mobility batteries keep your customers on the move. Our service program keeps you stocked.

To-Your-Door Solutions

We base pricing on our core exchange program. Our exchange program helps us keep your costs stable, despite the market's monthly lead fluctuations.

- We deliver factory-fresh batteries to your door and keep your shelves stocked.
- Our no-risk consignment allows you to pay for the product after it's sold, lowering inventory costs.
- With nearly 300 warehouses across the nation, we have a location near you.

All of this guarantees you're never without an Interstate® battery.

Reliably Recycle Every Battery

We recycle more batteries than we sell. Let Interstate Batteries serve as your one-stop shop for supply and disposal. In our recycling program, our route sales managers pick up your spent batteries for EPA-approved recycling as part of our regular delivery. Our recycling program protects you from environment liability.

KEEP YOUR CUSTOMERS ON THE GO

Sealed and Maintenance-Free

A one year free-replacement guarantee backs every mobility battery.

Perform Under Pressure

Every Interstate battery has longer life and quicker response times due to:

- Higher capacity
- Lower internal resistance
- Voltage maintained at high levels during discharge

Off-the-Shelf Means Ready-to-Go

Every battery comes ready right off the shelf to move scooters and wheelchairs with no break-in cycle.

Built to Move

Every battery features the Department of Transportation/International Air Transport Association symbol, ensuring your customers can take the mobility batteries over land, sea or air without removal from the chair. Each mobility battery passes all travel requirements for pressure, vibration and crack/rupture standards.

Medicare Guidelines

Under current guidelines, Medicare recipients can replace their battery once a year. See the back of this brochure for eligible Healthcare Common Procedure Coding System (HCPCS) codes.

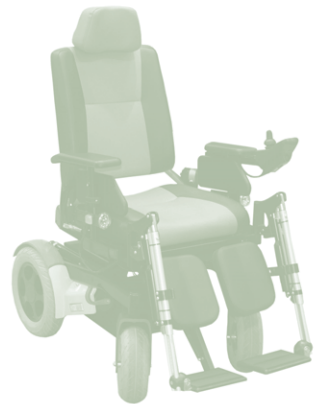

START STOCKING RELIABILITY

While many of our competitors use “general purpose” technology that yields less-than-optimum deep-cycle performance and durability, each of our mobility batteries provides up to twice the battery life of SLA non-deep cycle types. Our unique battery design guarantees long life for wheelchair and scooter applications.

Our Do-It-All Service

Interstate Batteries provides unparalleled service through our nationwide distribution system and one year free-replacement warranty.

Let us provide your complete battery solution and let your customers enjoy worry-free transportation.
