

12-VOLT GOLF CAR BATTERY

Premium Quality

C3 Advanced Capacity Technology

A paste reformulation that extends capacity in three ways – initial, peak and cycling. C3 also improves reserve capacity (RC) up to 6% and enhances ability through fortified plate construction.

Recharge Acceptance

A special positive grid alloy resists corrosion and decreases water usage, improving recharge acceptance and extending battery life.

SpeedCaps™

Open all vent ports with one twist for easy maintenance.

Crystalock Technology

A special curing process that adds stability to the battery plates and helps keep the paste from breaking down, a key to long cycle life.

Thicker Grids

Results in thicker plates giving you longer battery life.
