

12-VOLT GOLF CAR BATTERY

Premium Quality

High-density Paste

Specifically engineered to extend the life of conductive material while increasing runtime.

Mudrest

Collects paste waste as the battery ages for optimal life.

Easy-access Watering Ports

A one-twist lever enables quicker maintenance to keep your battery running at peak performance.

Premium Separator Technology

Unique design forms a superior barrier between positive and negative plates allowing electrolytes to flow freely for maximum battery life.

Lead Antimony Grid

Works in conjunction with the high-density paste to reduce corrosion and improve battery performance.
