

2X THE LIFE OF CONVENTIONAL AGM BATTERIES

MT7 AGM: It took a lot to make a battery you can forget about.

Interstate's new MT7 AGM automotive battery gives you the competitive advantage. Designed for today's vehicles with lots of electrical accessories and with today's drivers using lots of plug-in devices, this absorbed glass-mat (AGM) battery feeds power-hungry vehicles while serving up powerful engine starts.

Designed for High Accessory-load Vehicles

European imports
Minivans

SUVs
Luxury domestics

Ambulances
Police vehicles

Some batteries serve up more starts. Others deliver deep cycling. The MT7 AGM does both – in a bigger way than typical dual-purpose batteries.

Interstate's Longest Free-replacement Warranty: 48 Months

HIGH-TECH DESIGN FOR HIGH-TECH DRIVERS

The Pure Matrix™ Advantage

A 99.99% pure non-alloy lead and an efficient ultra-thin plate design means deeper cycles, rapid recharges and superior cycle life.

2X to 3X the Battery Life

Expected service life is two times as long as a conventional lead alloy AGM battery and three times that of a conventional flooded battery.

Cranking and True Deep Cycling

The MT7 AGM produces 400 cycles at 80% depth of discharge while delivering 40% more power for 5-second engine cranking. Most batteries do one or the other, but not both.

More Starts

The MT7 AGM delivers more than 10,000 starts at 5% depth of discharge.

Interstate's Longest Warranty

The free-replacement period for the MT7 AGM reaches beyond any in Interstate's automotive line: 48 months.

Slow Self-discharge

The MT7 AGM has one of the lowest self-discharge rates in the industry.

Mounting Flexibility

The MT7 AGM is nonspillable and can be mounted in any position except upside down.

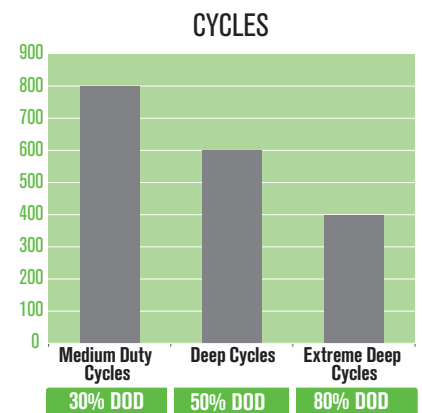

SELL THE SMART CHOICE

Ask your customers:

“Do you use accessories like the radio or plug-ins like a DVD player or a GPS device while the engine is off?”

If the answer is “yes,” recommend the new MT7 AGM as an option.

Whether used for extreme deep cycling or just for cranking power, the MT7 AGM provides true 2-in-1 performance.

MT7 AGM SPECIFICATIONS			
	MT7-34	MT7-65	MT7-78
Cold Cranking Amps (CCA)	800	770	800
Cranking Amps (CA)	1000	965	1000
Reserve Capacity (RC)	115	130	115
