

COMMERCIAL **GROUP 31**

The right battery adds years to your fleet.

Choose the right battery to get the most battery life. To choose the right batteries for your fleet, consider the type of equipment you have and how it is used. The right battery does more than meet the original cold cranking amps rating requirements. The right battery can tackle your climate, on or off-road use, any deep cycling needs for APUs or HVAC systems, as well as any aftermarket accessories.

31-VHD

660 CCA / 160 RC

For those mid-size generators and small delivery trucks, the 31-VHD provides just the right power to deliver long battery life.

Select a 31-VHD for: local pick-up and delivery, low cranking needs, warmer climates, minimal engine-off power loads

Warm climates

Small delivery trucks

Medium to small generators

31-ECL

700 CCA / 190 RC

520 Medium Cycles

The deeper-cycling 31-ECL delivers battery life when you need much more power than a typical starting battery delivers. Count on moderate cranking power to start your truck engine and the cycling power to run your lift gates, lights, APUs, and any other aftermarket accessories.

Select a 31-ECL for: Deeper cycling needs with moderate cranking power

Sleeper cabs with hotel loads

Auxiliary power units in big rigs

Ambulances with high electrical demands

Medium to small generators

Refrigeration units

Trucks with electric lift gates

31-LHD

750 CCA / 180 RC

The 31-LHD delivers the best performance with engines and generators having moderate cranking and low cycling needs.

Select a 31-LHD for: High-heat climates, refrigeration units or mid-size generators

31-MHD

950 CCA / 195 RC

Designed for large generators and engines, the 31-MHD is intended for high cranking needs while delivering moderate cycling power.

Select a 31-MHD for: Moderate engine-off power and reliable cranking power in cold weather

Day cabs

Cold weather package

Larger generators

Large diesel engines

31-XHD

1000 CCA / 195 RC

While everything else locks up in the cold, the 31-XHD cranks through the deepest chill. This battery delivers extreme cranking power to turn over the heaviest of engines.

Select a 31-XHD for: Reliable starts for large engines or trucks outfitted for cold weather

400 Extreme* Cycles

The true 2-in-1 pure lead 31-AGM7 delivers both high cranking and extreme deep cycle power. It delivers a service life 3x longer than conventional flooded batteries and 2x longer than alloyed lead AGM batteries.

Select a 31-AGM7 for: Extreme conditions with unbeatable vibration resistance and deep-cycling power for hotel and HVAC loads needed for "creature comforts."

* 80% depth of discharge

Sleeper cabs with hotel loads

Oil field equipment with high heat and vibration

Auxiliary power units for big rigs

Off-roaders used to heavy vibration

Ambulances with high electrical demands

Trucks with electric lift gates

Concrete mixers working on or off-road

Recreational vehicles with high-power demands

Dump trucks
